

A detailed 3D rendering of a complex industrial conveyor system. The system consists of multiple levels of black metal frames supporting various conveyor types: roller conveyors with white rollers, belt conveyors, and curved sections. Several cardboard boxes and white plastic bins are shown at different stages of the system, illustrating its capacity for handling different types of goods. The background is a clean, light gray, and the entire scene is framed by two large, diagonal yellow bands that create a sense of dynamic movement.
